Guidewire: PolicyCenter (v7/8/10/Cloud), BillingCenter, ClaimsCenter, Agent Portal
Tools/ Frameworks: Agile/Scrum, Rally, JIRA, Trello, HP ALM, ServiceNow, Microsoft Excel
Data/ Languages: MS SQL Server, Oracle, MongoDB, Tableau, Splunk | Python, SQL | AI Agents

PROFESSIONAL EXPERIENCE

Encova Insurance | Columbus, OH
Personal Lines and Commercial Lines | Guidewire PolicyCenter, BillingCenter, Agent Portal, Claims Center

IT Business Analyst III (Senior BA)	IT Business Analyst II	IT Business Analyst
May 2025 – Present	*Jun 2023 – May 2025*	*Aug 2022 – Jun 2023*

- Owned end-to-end requirements lifecycle across multiple Personal and Commercial Lines initiatives — eliciting and documenting business, functional, and non-functional requirements from client stakeholders; authored requirements management artifacts including BRDs, FSDs, use cases, and RTM; served as liaison between business stakeholders and technical teams to ensure solutions met defined requirements through UAT sign-off.
- Collaborate closely with business SMEs and underwriting stakeholders to document functional and non-functional requirements; author BRDs, FSDs, user stories, and acceptance criteria that serve as clear, detailed handover packages to development and configuration teams.
- Partnered with solution architects and technical consultants to review Guidewire PolicyCenter design configurations; conducted GAP analysis to identify product gaps and process impacts across Homeowners coverages, rating, and underwriting; participated in solution design reviews and demos to validate that delivered configurations met documented business and functional requirements.
- Participate in Sprint Reviews and support feature demonstrations to business stakeholders; actively facilitate Sprint Planning, Backlog Refinement, and Retrospectives using Rally and JIRA within an Agile/Scrum framework.
- Built a Copilot AI agent for automated comparison of Commercial Lines and Workers' Compensation policy forms, enabling faster gap identification and improving accuracy of compliance and underwriting reviews.
- Led requirements elicitation and facilitated working sessions with business stakeholders and IT developers to govern Workers' Compensation and Commercial Lines data migration — defining historical vs. active migration strategies, establishing look-back periods, and driving alignment on in-scope vs. out-of-scope data elements.
- Conducted GAP analysis between legacy infrastructure and Guidewire requirements; produced AS-IS / TO-BE process documentation, activity diagrams, and RTM with end-to-end coverage from business requirement through UAT sign-off, anticipating downstream impacts across coverages and compliance.
- Mentored and provided guidance to junior Business Analysts on Guidewire documentation standards, FSD/BRD authoring, and RTM best practices; helped establish BA function standards and served as the go-to onboarding SME for new PolicyCenter team members

AMG Technology LLC | **Requirements Analyst** | Emerson, NJ — Client: Nationwide Insurance *Oct 2020 – Jul 2022*

- Served as Business Analyst for large-scale P&C core system modernization at Nationwide Insurance — eliciting, documenting, and handing over requirements for Personal Lines production enhancements across Homeowners, Auto, and Umbrella lines of business; collaborated with business SMEs to translate needs into clear functional specifications for development and configuration teams.
- Supported development teams during implementation through requirement clarifications and pre-UAT validation; managed defect lifecycle in JIRA and HP ALM, led defect triage, and conducted UAT to validate software solutions that met all business requirements.
- Participated in Agile ceremonies (Sprint Planning, Refinement, Sprint Reviews) within a cross-functional delivery team; maintained backlog alignment and requirements traceability across all initiatives.
- Led requirements migration from IBM RRC to JIRA R4J with full validation testing to ensure end-to-end requirements traceability; created business process flows, use cases, and activity diagrams for AS-IS / TO-BE Personal Lines workflows on behalf of client Nationwide Insurance.
- Conducted system investigations and root cause analysis for Personal Lines production issues (Homeowners, Auto, Umbrella) via Splunk/ServiceNow.

Codersdata | **Data Analyst** | Los Angeles, CA *Nov 2019 – Sep 2020*

- Data engineer delivering automated reporting, SQL analytics, advanced Excel solutions, and data-driven insights across diverse industry clients.

View Inc. | **Process Engineer** | Olive Branch, M *Jul 2019 – Oct 2019*

- Built end-to-end data reporting infrastructure with MySQL and Tableau; collaborated with SMEs to define requirements, document business processes, and deliver weekly KPI insights; conducted root cause analysis for production quality defects.
